

IHC Metalix

The technology innovator.

IHC Metalix...

... facilitates freedom in super yacht design!

Building super yachts means meeting the highest possible demands. At the same time, the finished product has to be realistically priced. IHC Metalix is eager to take up this challenge.

IHC Metalix is market leader of high quality construction kits and we have supplied numerous parts for over a hundred super yachts built by well-known yacht builders. With our in-house developed Delivery Unit System we deliver just-in-time to suit your specified building sequence. Each delivered part is fully traceable, has the necessary coding for assembly and can be followed by track & trace on our website.

To meet your material requirements IHC Metalix delivers and processes different types of metal such as steel, aluminium or stainless steel. It is obvious that the quality of these carefully selected materials, the state-of-the-art technology, as well as the personal service we offer, is at the highest level.

- tailor made construction kits
- 3D fairing and shell plate services
- full traceability
- track & trace, incl. web access (on all part levels)
- full service (from workshop drawings up to start of building)
- transparency (in processes and performance)
- automated and advanced profile and plate part production
- service desk (production control and speed parts)

Our working method is accredited to DNV ISO 9001 standard.
